

## Ready for adventure

### What does this mean for customers?

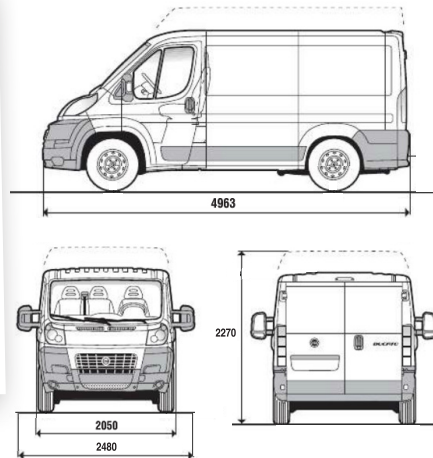

Hi there! I'm Richard. I've been building campervans for over 20 years and can offer a wealth of expertise and knowledge. Orange Campers is a small family run company. As camper enthusiasts we understand what makes a van work, that's why we build in many 'extra' features as standard.

With practicality and quality at the heart of every build, we have designed a campervan that is truly ready to go and it won't disappoint! We have incorporated some luxuries on the van itself, as well as practical essentials to ensure your vehicle will run smoothly whilst you are off grid – including the twin leisure batteries, 120 Watt solar panel and 90 litre family size fridge.

Safety and security is paramount with a fully crash tested triple seat, Isofix for your child seats, an additional passenger airbag, plus we fit all of our campervans with a Thatcham approved tracker system to ensure maximum security. Extreme canvas on your elevating roof also means you will stay cosy and dry in your roof bed. It's the little things that make a difference whilst you are on your adventures!

\*You can of course still choose additional extras! Please take a look at our website for options available

*- Words from the owner, Richard*

### Specifications: Based on Fiat Ducato 3300kg

- Travel Seats: 5 (6 with double passenger seat)
- Berths: 4 (5 or 6 when using Cabbunk bunk beds)
- Length: 4.96m
- Van Width: 2.05m
- Width (mirrors in): 2.28m
- Width (mirrors out): 2.48m
- Height (roof closed): 2.27m
- Gross weight: 3300kg
- Estimated payload: 1125kg
- Maximum towing weight: 2250kg

### What our customers say...

We had been looking for a campervan for some months. A van we could take more or less anywhere and could park on our drive or normal parking space.

...We were immediately struck by the light spacious interior and harmonious finish.

...As we got talking to Richard his passion for campervans and particularly this one he had created based on his many years experience as a vehicle engineer, craftsman and end user quickly became apparent...

For two 6 footers, the fact we can nearly stand up straight without popping open the top and sleep well in the 4'6 bed makes life comfortable.

We would thoroughly recommend this family run business and can't wait to start on our bucket list of places to visit.

- Gary Dean, Nov 2020

# Trouvaille

## Ready for adventure

**Orange**  
CAMPERS

## *A small campervan with a large interior feel*

Based on the short-wheelbase Fiat Ducato, the Trouville is under 5 metres long. Comparable in length to a short-wheelbase VW T6.1 but, being wider, the Fiat Ducato provides the extra space necessary to offer a more spacious living area. With a head height of 5'8" with the roof down, the Trouville is a higher than average low roof camper. It also boasts a surprisingly large boot space for a small campervan, meaning you won't need to worry about fitting in any bulkier items you may need for your trip!

This generous five-seater can accommodate a large family and impressively can be configured to carry and sleep up to 5 or 6 people. Safety is priority with a RIB crash tested triple seat and Isofix child seat fixing points. It also features one of the largest double beds in its class. The kitchen is fully equipped, including a 90 litre family size fridge / freezer, plus an external BBQ point for your outdoor cooking needs.

With practicality and quality at the heart of every build, plus many extra features included as standard, you can be sure that the Orange Campers Trouville is all you need to kick start your new adventures!

### Trouville Key Features:

- Generous 5 seater including driver & passenger swivel seats (6 seater with double passenger swivel seat)
- 4 Berth. Impressively could sleep up to 5 or 6 with Cabbunk children's bunk beds
